

Joni Falascino

Executive Vice President, Quality, Environment, Health & Safety, and Innovation
Westinghouse Electric Company

Joni Falascino was named executive vice president, QEHS and Innovation, in January 2019 with responsibility for the Quality, Environment, Health & Safety organization; Innovation; Transformation; and Global Information Systems and Technology.

Ms. Falascino had previously served as senior vice president, Global Enterprise Services since 2017, with responsibility for leading and aligning global enterprise services – including Global Information Systems and Technology, Facilities, Security and Global Nuclear Supply Chain.

Prior to this role, Ms. Falascino served as vice president, Project Delivery, in the New Plants and Major Projects business, with accountability for facilitating the delivery of new plant projects worldwide. Throughout her Westinghouse career, she has held roles of increased responsibility in numerous areas across the company, including corporate functions, New Plant, Engineering and Instrumentation and Control (I&C) product lines. In her 30 years in the nuclear industry, each opportunity has provided Ms. Falascino with a diverse learning experience regarding products, employees, customers and the industry in general.

Ms. Falascino has a bachelor's degree in computer science and a master's degree in telecommunications from the University of Pittsburgh. She is a certified Customer 1st Green Belt and also received certification from the Women's Executive Leadership Program, Duquesne University School of Business.
