

**María Teresa Domínguez** joined Técnicas Reunidas in 1974 and is Head of the Advanced Projects Division of Empresarios Agrupados Internacional, S.A., an architect-engineering company under Spanish law. She has over 40 years of nuclear related experience in Fission and Fusion. In Fission, she was involved in the construction and operation of the Spanish NPPs (LWR, Gen II and III). In the 90's, she was involved in

the Advanced Reactors Programme, supporting the Design Certification of the PWRs and BWRs (LWR, Gen III+), and in parallel, in the GEN IV NPP development. She has also participated in the deployment of new reactors construction in several European programmes in Finland, Switzerland, Czech Republic and others. In fusion technology, she has more than 20 years' experience, chairing several contracts for ITER project, IFMIF, DONES and other fusion facilities.

She has been member of the Advisory Group on Energy (AGE) to the European Commission.

She has participated in the Independent Expert Group Review Panel of the EC for Potential contribution of the Jet Facilities to Fusion Research.

She has been president of the Spanish Nuclear Society.

She has been president of the Spanish Nuclear Industry Forum.

She is member of the American Nuclear Society.

She is member of the FIIF (Fusion Industry Innovation Forum).

She is member of the Governing Board of the SNETP (Sustainable Nuclear Energy Technology Platform).
