

## **SILVIA RUEDA Brief CV**

Silvia Rueda is member of the Engineering Management of the Spanish radioactive waste management agency (Enresa).

Her professional activity has always been within the nuclear sector.

From 1992 to 1998 she was the manager of Physicists Professional Association (Cofis).

In 1998 she joined Enresa, where she has occupied different positions. She has been specially involved in the licensing and characterization process for the Centralized Interim Storage Facility (ATC) for spent fuel and high level waste in Spain.

She is responsible for the environmental assessment of radioactive waste plans and of projects for the licensing of nuclear facilities for radioactive waste storage. She is also responsible for the seismic surveillance of Enresa nuclear facilities.

She supervises several R & D projects related to nuclear site surveillance, environmental monitoring, and research of new materials for the storage of radioactive waste.

Silvia has a broad teaching experience in radioactive waste management, participating as speaker in numerous national and international conferences.

Silvia Rueda has a Bachelor in Physical Sciences from Madrid Complutense University.
